Quality Institute Member Events — Starting Out Strong in 2026

At the Quality Institute, we've started 2026 with clear priorities and focus. Earlier this week, we gathered members in South Jersey for a regional member meet-up. Thank you to [The Cooperative](#) for hosting us in their welcoming community room in Camden. Catching up with health care leaders in South Jersey who talked about their commitment to quality, as well as their innovative approaches, highlights the focus we all share on health care quality. To me, it was the right way to begin a new year.

In another event this morning, we brought together more than 150 members and partners for a virtual gathering to recognize the Quality and Safety teams in New Jersey hospitals. The event was for support as well as continued learning. The focus was on the risks of dismissing patient, family, and caregiver concerns.

We heard from Shannon Kooker, MSN, RN of [ECRI](#), who outlined why the dismissal of patient, family, and caregiver concerns is the number one safety concern in ECRI's report, "[Top 10 Patient Safety Concerns 2025](#)."

Participants also heard from Quality Institute Vice President of Quality, Adelisa Perez-Hudgins, MSN, RN, and Lydia Weber, DNP, VP, Chief Patient Safety Officer & HRO,

Hackensack Meridian Health. Our presenters shared actions organizations can take to prevent harm from dismissing a patient’s gut feeling, a caregiver’s observation, or a family member’s repeated worry.

To make these lessons available more widely, information from the session is accessible in the Quality Institute’s newest quality brief, [When Patients Speak](#), which outlines evidence-based practices for elevating concerns into actionable safety signals. The quality brief contains practical tools and quick-win actions your organization can implement immediately. From adjusting handoff templates to piloting escalation cards, there are achievable steps that can make a significant difference for patients.

We invite you to check out the [quality brief](#), attend one of our [upcoming learning sessions](#), or networking events.

2025 ANNUAL REPORT

The Quality Institute’s [2025 Annual Report](#) is now available. The report highlights progress across key focus areas, including policy updates, patient safety, maternal and infant health, mental health, and community health. Together with health care stakeholders and community partners, we continue advancing the safety, quality, and affordability of health care for everyone in New Jersey.

NEW JERSEY HEALTH CARE
QUALITY INSTITUTE YEAR IN REVIEW 2025

Dear Quality Institute Members,

Throughout 2025, the Quality Institute advanced meaningful solutions to improve health care safety, quality, and affordability in New Jersey. We pursued this work with many of you.

We remain guided by our core belief that lasting change is built on trust, collaboration, and accountability. As 2026 begins with new state leadership and significant challenges from federal health policy changes, our mission remains clear and urgent. We are committed to partnering with our members, community leaders, and policymakers to improve health care quality and access for everyone.

Our 2025 accomplishments reflect the strength of our collaborations and the shared dedication of those who work alongside us. We look forward to advancing our mission together. Thank you for your support and partnership.

John Leyman
