New Jersey Hospital Price Transparency Report

New Jersey Health Care Quality Institute

December 13, 2009

December 13, 2009

As health reform continues to take center stage in state and national policy debates, the New Jersey Health Care Quality Institute (NJHCQI) believes it is important to provide some context on the cost issue which has loomed as such a major issue in the debate and especially to focus on the out-of-pocket costs confronted by the uninsured.

This report provides pricing data of 20 common treatments. In New Jersey there are three levels of pricing reflecting state regulations which set a “ceiling” on what can be charged to an uninsured individual. They are:

- More than 500% of the Federal Poverty Level (FPL) = Charges
- Between 300% and 500% of the Federal Poverty Level (FPL) = 115% of the Federal Medicare Rate
- Less than 300% of the Federal Poverty Level (FPL) = the State Medicaid *fee for service* Rate

We have provided pricing in all three of these categories for each of the 20 conditions reported for each of New Jersey’s acute care hospitals. Therefore, the prices on these charts represent the maximum charge permitted in each of these billing categories. This should assist uninsured individuals in determining the maximum price for which they are responsible.

You will note significant price variance across hospitals. Consumers can realize significant savings by choosing to have their procedure done at a nearby but less costly hospital. The data is organized by region to make this comparison easier. It is important to note that these costs are important to everyone as they also influence the negotiations of health insurers with hospitals and therefore the prices they pay on your behalf. Eventually those charges are borne by consumers and employers through premiums, co-payments, deductibles and caps on insurance coverage.

Most hospitals should be willing to negotiate out-of-pocket costs for consumers so this chart can serve as a reference in that process much like the “Blue Book” of automobile value that allows consumers to see a maximum reference price from which to begin their negotiation.

We know that the statistics contained in this report are startling and may seem overwhelming, but the time for transformation is upon us and we are eager for change that benefits consumers, hospitals, health plans, employers as well as our state and nation.

Sincerely,

The 2009 Poverty Guidelines for the 48 Contiguous States and the District of Columbia

December 13, 2009

<u>Persons in Family</u>	<u>Poverty Guideline</u>			
	<u>100%</u>	<u>200%</u>	<u>300%</u>	<u>500%</u>
1	\$10,830	\$21,660	\$32,490	\$54,150
2	\$14,570	\$29,140	\$43,710	\$72,850
3	\$18,310	\$36,620	\$54,930	\$91,550
4	\$22,050	\$44,100	\$66,150	\$110,250
5	\$25,790	\$51,580	\$77,370	\$128,950

8	\$37,010	\$74,020	\$111,030	\$185,050
More than 8 persons, add:	\$3,740			

Legend

** Notes a hospital is not certified by the Department of Health and Senior Services to practice this procedure.
All other lack in data notes charges not reported and/or procedures not practiced within the hospital.*

 *Notes the highest and lowest hospital charge to an uninsured patient above 500% FPL.*

Hospital charges are only averages of what the actual facility may bill a patient for such care. These charges do not include contracted doctors, such as an Anesthesiologist, Pathologist, Radiologist or Emergency Room Physician, who may bill each patient separately from the hospital. Though these charges are not true prices accurate enough for consumer shopping, patients are encouraged to use this as a starting point for comparing general procedures by facility.

Please also note the State Medicaid fee-for-service rate only applies to certain Medicaid populations, such as General Assistance and other carved out services, 12% of New Jersey's Medicaid population. The remaining 88% of the state's Medicaid population is in Managed Care, where charges are pre-negotiated.
