ATTENTION

Health Research and Educational Trust is an approved provider of continuing nursing education by the New Jersey State Nurses Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.
Provider Number P131-1/15-18.

This activity provides 1.0 contact hour.

There are no conflicts of interest, sponsorship or financial/commercial support being supplied for this activity. Accredited status does not imply endorsement by the provider or American Nurses Credentialing Center's Commission on Accreditation of any commercial products displayed in conjunction with an activity.

DISCLOSURE INFORMATION: Full disclosure will be provided at the educational activity.

Note: Active participation (computer screen open for the entire webinar) is required for registrants to obtain continuing medical education (CME) and nursing credits. Confirmation of active participation is reported through a Webex-generated summary indicating "attention to duration ratio" for each participant. To receive credits, attendees are also required to complete three polling questions and an evaluation at the conclusion of the program. Certificates will be provided only to those who meet this criteria. No exceptions to this requirement will be considered.

New Jersey Prescription Monitoring Program (NJPMP)

July 10, 2018

JEFFREY D. LASZCZYK, JR., PHARMD, BCACP, BCGP

NJPMP ADMINISTRATOR

"The Opioid Epidemic"

- **Governor declared *Public Health Crisis* in January 2017**
- Drug overdoses are the leading cause of accidental death in NJ
- NJ's overdose death rate is 3x the national average
- Since 2016, opioid-related deaths have increased by 30%
- 14,356 naloxone deployments in 2017

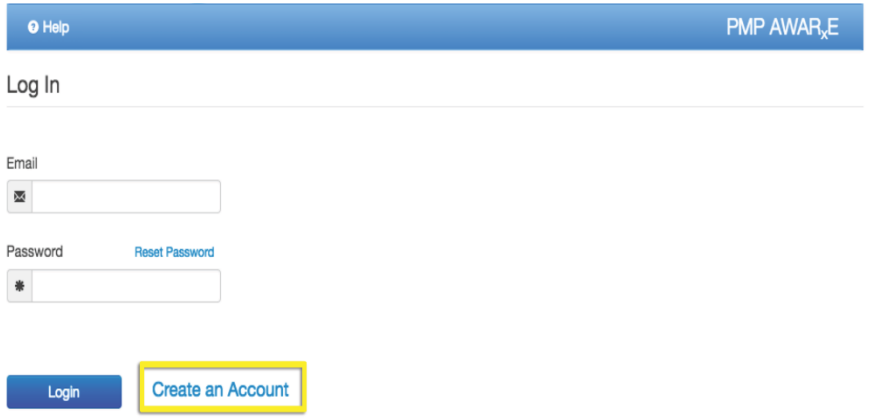
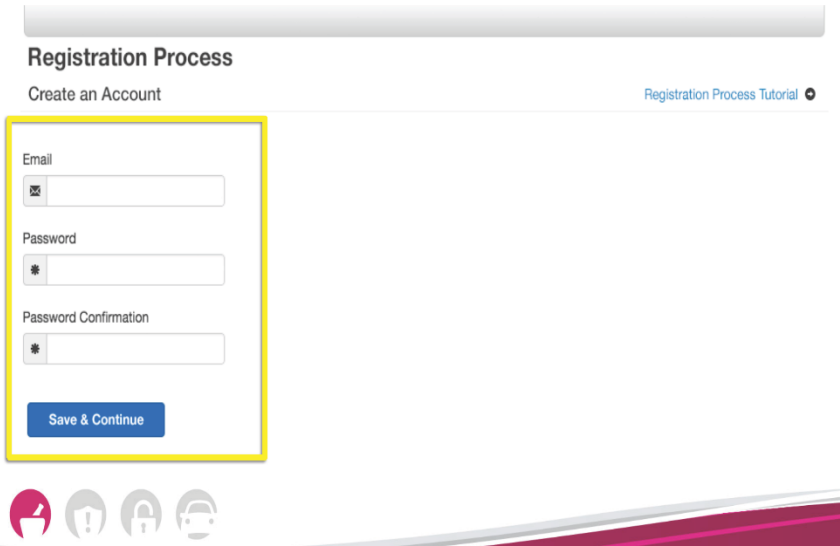
PMP AWARE PRESCRIPTION MONITORING PROGRAM

User Registration Process Tutorial

Log In Screen FIGURE 2.1



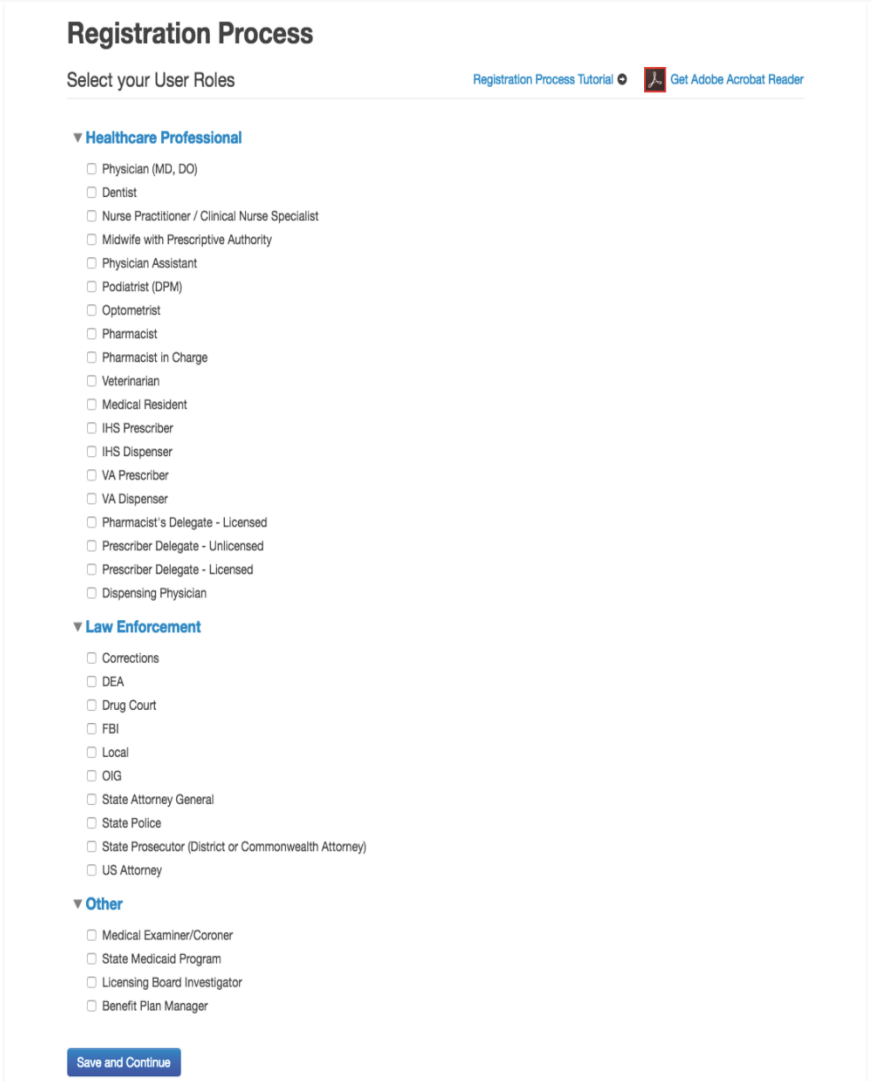
Create Log in Credentials FIGURE 2.2



How to create an account

1. Select *Create an Account* from the main login screen. **Figure 2.1**
2. You will be prompted to enter an email address and create a password. **Figure 2.2**
   - The email address you enter will be used as your login ID and as the primary email address for your account.
   - Password requires a minimum of 8 characters and must include one uppercase, one lowercase, and one symbol.

Click Save & Continue to create your account credentials and move on to the Role Selection screen.



About Role Selection & the Registry Form

Select your role from a predefined, categorized list. There are three primary categories:

- Healthcare Professionals
- Law Enforcement
- Other

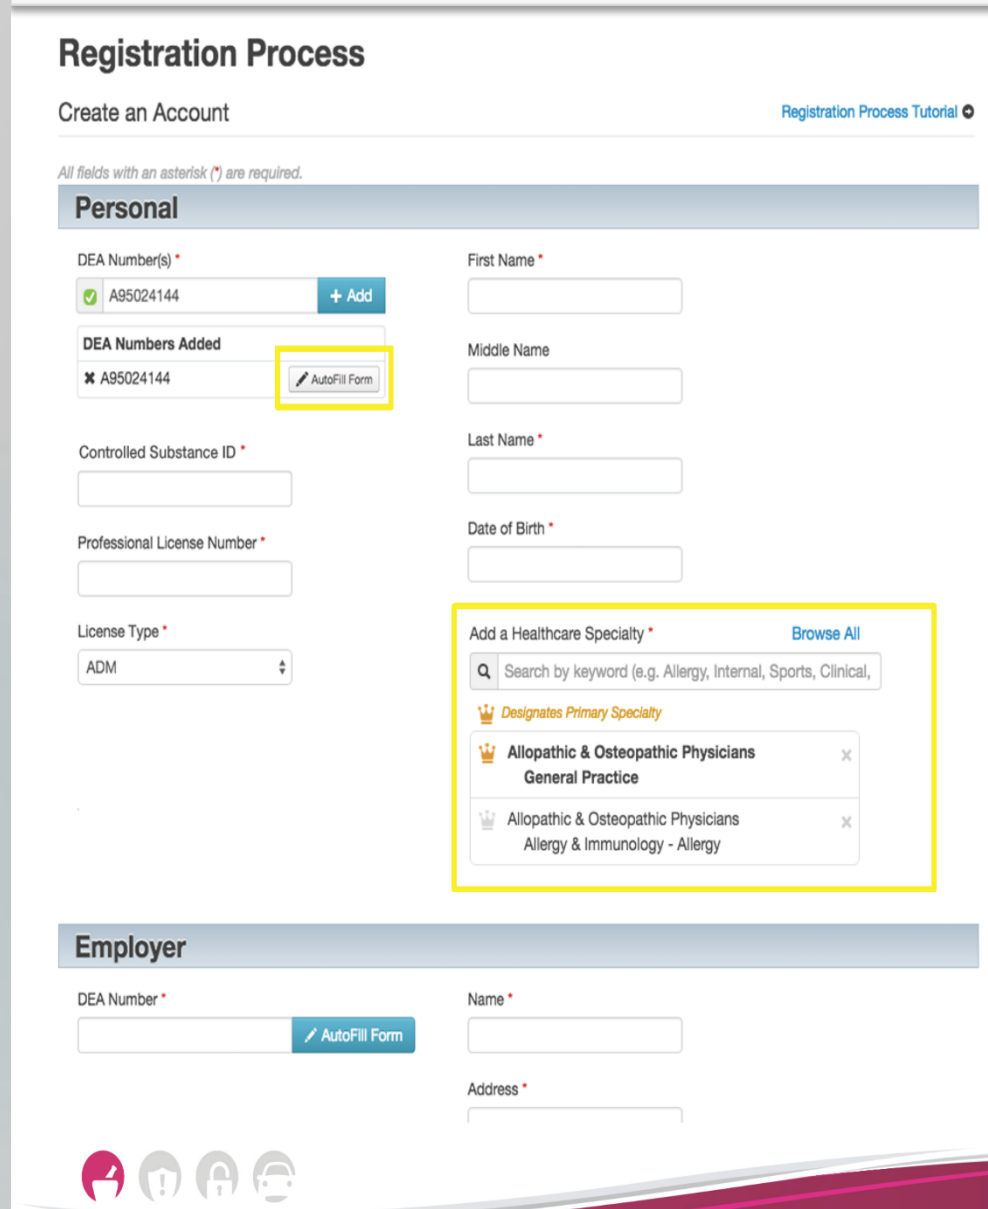
1. Click the Category Name to expand it and see the roles.

2. Select only one, then click *Save and Continue*.

Email Verification

When you arrive at the Registry Form, you will see a green banner message that says, "A link to verify your email address has been sent."

Go to your email account. Open the Welcome email from your PMP and click the link that says, **"Verify your email."** It should open the login screen and show a message that says, "Your email has been verified." That completes email verification. You can go back to your Registry Form and finish registering.



The Registry Form: Personal & Employer Information

Enter your Personal and Employer information. Required fields vary depending on the role you chose.

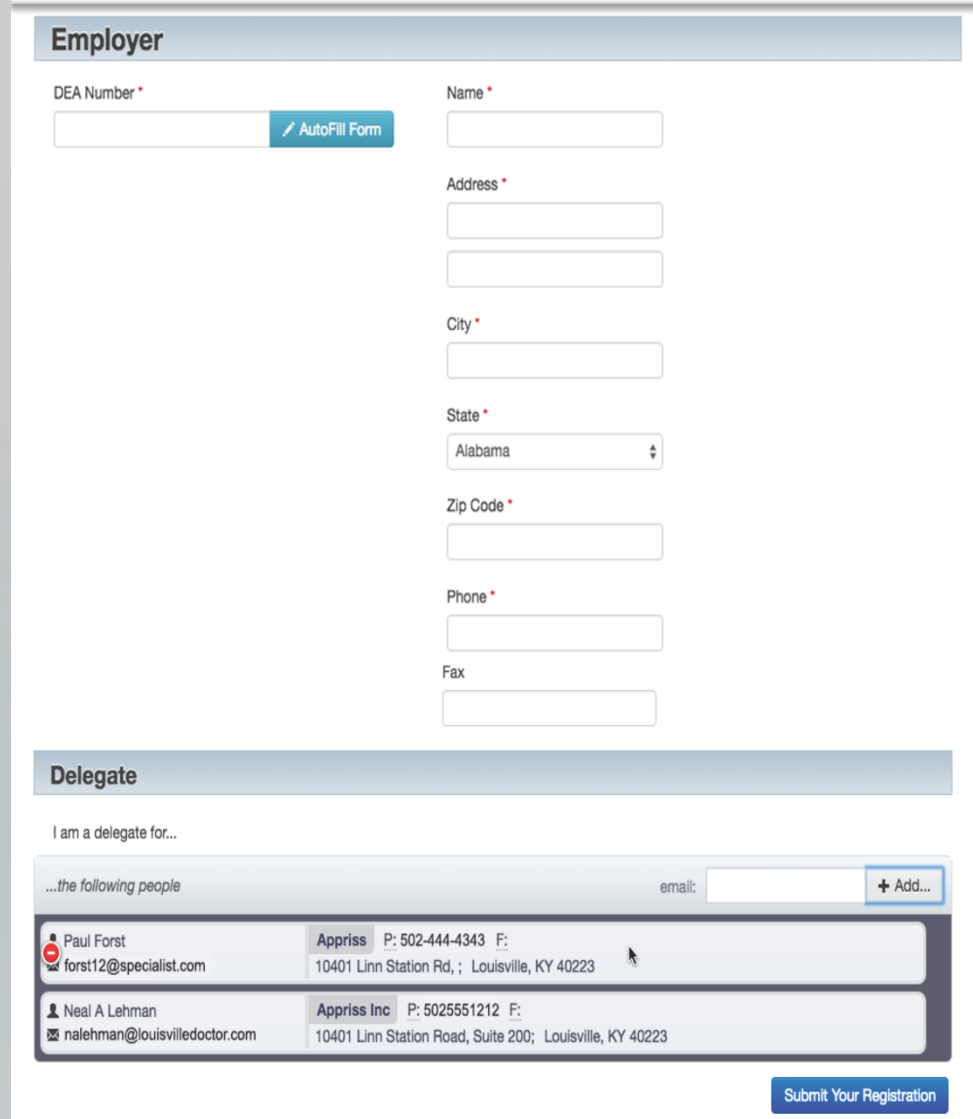
- Red asterisks indicate required fields.
- In the Personal section, you can add multiple DEA numbers, if necessary.
- Healthcare Specialty is the official Healthcare Taxonomy Code description. *(may not appear in some State PMPs)*

AutoFill Buttons

You can populate the form with information from the DEA number you entered by clicking the *AutoFill Form* button.

When you complete all required fields on the Registry Form, click *Submit Your Registration*.

The system will determine what type of review your registration requires, if any.



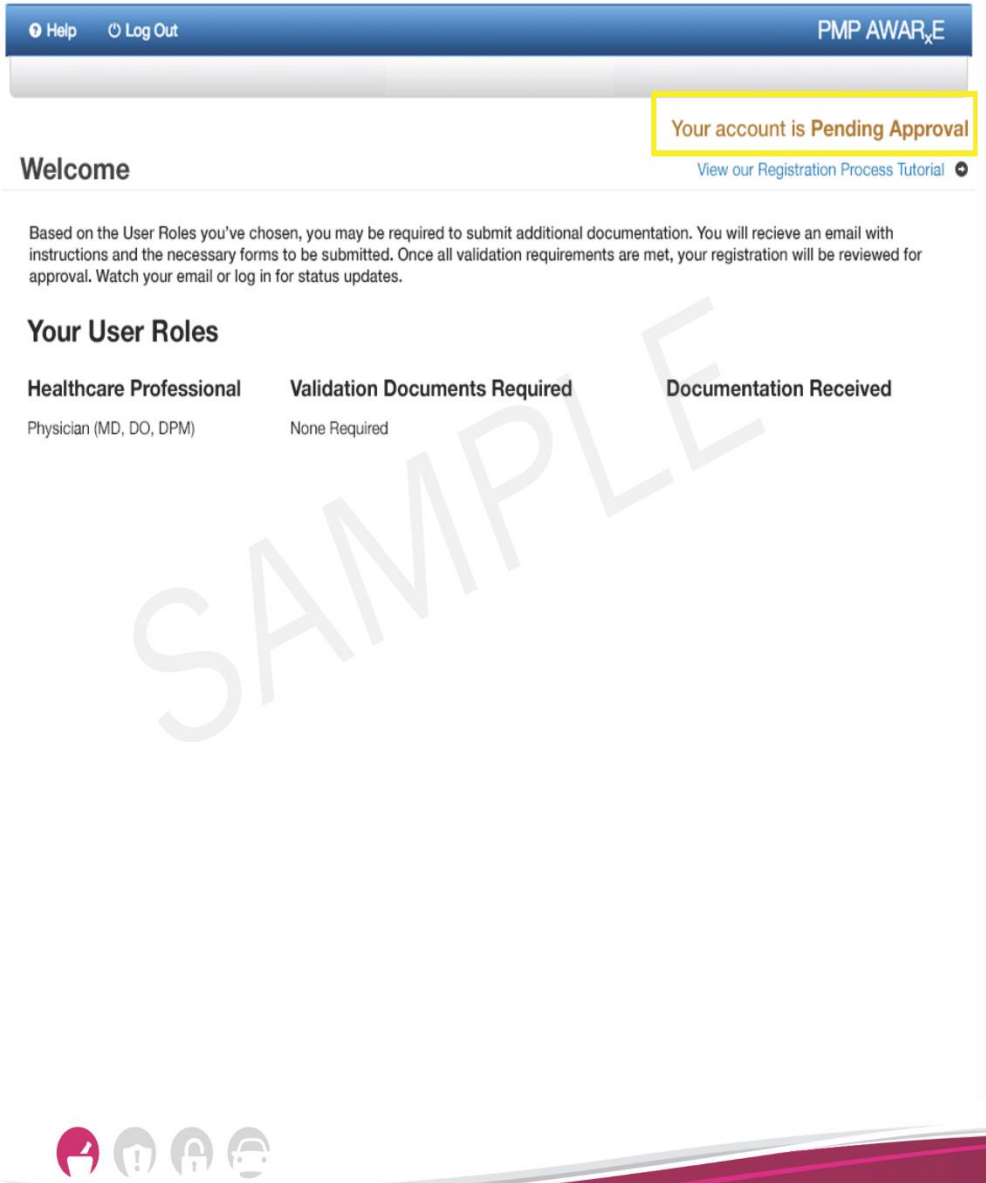
Delegate Registration

If you choose a delegate role, you will only have access to make patient requests on behalf of your supervisor or someone who authorizes you to request reports on their behalf.

You will have an additional Delegate section on the Registry Form.

IMPORTANT: Your supervisor must be registered and approved before you can register as their delegate.

If you select a delegate role, you must specify the supervisor for whom you make requests. In the Delegate section, add each supervisor by the email address each used to register. Then click, *Submit Your Registration* to continue.



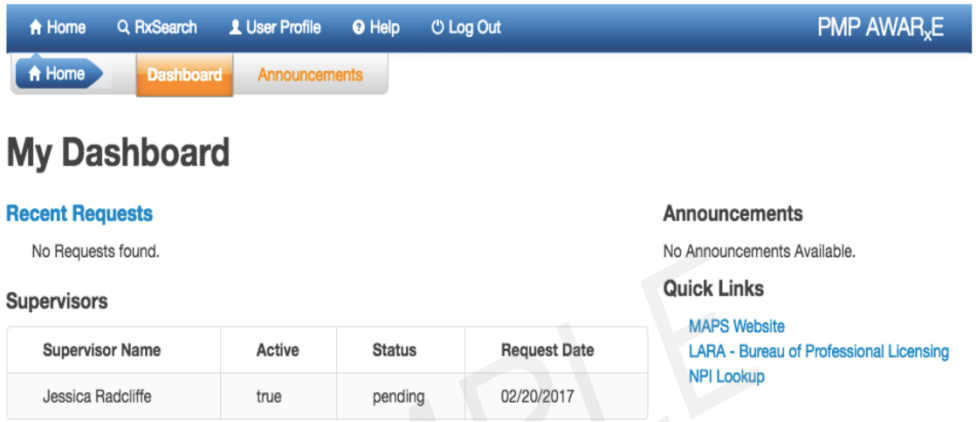
How Manual Admin Approval Works

If your registration requires admin approval, you will be directed to a Welcome screen that displays a **Pending Approval** account status.

If your role requires validation documentation, you will see the requirement listed under **Validation Documents Required**. Your account status will be shown as **Incomplete** until you submit the required documents.

You will receive a confirmation email when the admin approves your account.

Log in using the email address and password you created during registration.



How Delegate Supervisor Approval Works

If you are a delegate and your account is Auto-Approved, you will be able to log in to your account.

However, your Supervisor still must approve you as their delegate to run reports on their behalf.

When you log in, your delegate status appears on the dashboard under Supervisors. If your supervisor has already approved you, the status will say, Approved.

If you are not showing approved, your supervisor's name will not appear in the supervisor dropdown on the Patient search screen.

After your supervisor logs into their account and approves you, you will see the change on your dashboard. Your supervisor's name will be a selection in the supervisor dropdown menu on the Patient Request.

NJPMP User Reports

Patient Request – summary of CDS, HGH, and gabapentin prescribed to an identified patient.

Bulk Patient Search – summary of CDS, HGH, and gabapentin prescribed to a group of identified patients.

Requests History – User and his/her delegate patient search history log.

MyRx – summary of CDS, HGH and gabapentin dispensed with user's DEA number(s).

*Per CDC guidance, the MME conversion factors prescribed or provided as part of medication-assisted treatment for opioid use disorder should not be used to benchmark against dosage thresholds meant for opioids prescribed for pain. Buprenorphine products have no agreed upon morphine equivalency, and as partial opioid agonists, are not expected to be associated with overdose risk in the same dose-dependent manner as doses for full agonist opioids. MME = morphine milligram equivalents. mg = dose in milligrams.

NJ Prescription Monitoring Program

For Too Many New Jerseyans, Addiction Begins in the Medicine Cabinet

The New Jersey Prescription Monitoring Program *(NJPMP)* is an important component of the New Jersey Division of Consumer Affairs' initiative to halt the abuse and diversion of prescription drugs.

Established pursuant to **N.J.S.A. 45:1-45 et. seq.**, the NJPMP is a statewide database that collects prescription data on Controlled Dangerous Substances *(CDS)* and Human Growth Hormone *(HGH)* dispensed in outpatient settings in New Jersey, and by out-of-State pharmacies dispensing into New Jersey.

Pharmacies are required to report information to the NJPMP on a daily basis to the PMP Clearinghouse using the ASAP 4.2 format. Prescriptions must be reported to the database no more than one (1) business day after the date the prescription was dispensed.

The Division of Consumer Affairs and the NJPMP Administrator keep patient information strictly confidential, in compliance with the **Health Insurance Portability and Accountability Act of 1996 *(HIPAA)* Privacy and Security Rules**.
