

Planned Parenthood of Northern, Central,  
and Southern New Jersey

## Who We Are. What We Do.

Our goal at Planned Parenthood of Northern, Central, and Southern New Jersey (PPNCSNJ) is to create the healthiest generation ever by providing health care, education, and advocacy for access to high quality and affordable health care for families in our community. Each year, we have more than 90,000 patient visits at our 17 health centers across 18 counties, and provide sexual health information to more than 26,000 parents and teens.

### Health Care

PPNCSNJ's skilled health care professionals are dedicated to offering all people high-quality, affordable sexual and reproductive health care. Our 17 health centers across 18 counties provide a wide range of services, including life-saving screenings for breast and cervical cancer, birth control, testing and treatment for sexually transmitted infections and HIV, and abortion care. Our medical staff treats all patients with respect and provides them with the confidential, non-judgmental care they deserve.

### Education

PPNCSNJ is a leading educator on reproductive and sexual health topics. We deliver comprehensive and medically accurate information that empowers adults, young people, and families to make informed decisions and lead healthy lives. Our innovative health education and outreach programs teach young people how to make healthy decisions to lead healthy lives, and we train teachers, parents, and caregivers how to have honest, open discussions with the young people in their lives.

### Advocacy

PPNCSNJ is a passionate and tireless advocate for reproductive health care access and policies that enable all people to access the care, education, and information they need. Whether talking with members of the New Jersey Legislature, the media, or faith leaders, we educate our community about commonsense policies that protect and expand access to high-quality reproductive health care services and medically accurate sex education. With tens of thousands of supporters in New Jersey, we help our supporters stay involved with campaigns that advance and protect reproductive health care access.
