TEAMBIRTH NJ COHORT 4

TeamBirth is a shared decision-making program that aims to improve safe and respectful childbirth care.

It involves a series of team huddles and other tools used during labor and delivery, to improve communication and ensure care that aligns with patient preferences.

Developed by Ariadne Labs, TeamBirth was designed to operationalize best practices in communication, teamwork, and clinical care, in collaboration with experts from the major

TeamBirth Core Knowledge & Skills

TeamBirth **Core** Components

Critical to successful delivery of TeamBirth across the maternal health continuum

1.

STRUCTURED TEAM HUDDLES

Structured conversations that includes the birthing person and their support people

2.

SHARED PLANNING TOOL

Visual tool that structures communication and provides space to document discussions during huddles

Shared Planning Tool

TEAM

PREFERENCES

PLAN

Me

Baby

Progress

Shared Planning Tool
Version April 2024

TEAM

KEY BEHAVIOR: Promote the role of each team member

INTENT

To ensure all roles have valuable input in shared decision-making

To establish **psychological safety** by providing an invitation and ongoing opportunity to participate

DETAILS

Verbalize that a TeamBirth huddle is occurring

Start with the patient followed by their support people

Ensure relevant team members are included

May include additional information (e.g. here until 7 pm shift change)

PREFERENCES

KEY BEHAVIOR: Elicit patient preferences, thoughts, & concerns to inform the current plan

INTENT

To humanize the person giving birth & gain insight to what matters most now

To give customized clinical care

To facilitate **equitable care**

DETAILS

May include referencing an already established birth plan

Expect them to change over time

They are opportunities to discuss expectations

Encourage support people to help write in this section

Should be written in the patient's word choice (ie. break water vs AROM)

CONNECTION: **PREFERENCES** AND **PLANS**

Patient preferences discovered in the Preferences section of the Huddle directly inform what is prioritized in the Plan section.

Elicit patient preferences that
inform care planning

Distinguish the different care plans for the
birthing person, baby, and labor progress

PLAN

KEY BEHAVIOR: Distinguish the different care plans

INTENT

To ensure transparency and precision during care planning

To facilitate clear communication and **shared-decision making**

DETAILS

Plan content should be written in patient friendly language

Each Huddle the Plan should be discussed even if no change is made

Can be updated more frequently as needed by the nurse

Shared Planning Tool
Version April 2024

NEXT HUDDLE

KEY BEHAVIOR: Set shared expectations for the timing of the next huddle

INTENT

To reduce uncertainty for the patient and support person

To facilitate **situational awareness**

DETAILS

Identify planned times for huddles

(e.g. next labor evaluation, in a specific time frame)

Identify likely reasons to initiate an as needed huddle

(e.g. if pain increases, a decision needs to be made)

Anyone can request a huddle

They can occur in-person or over the phone/video conference

Next Huddle

Facilitating situational awareness

Shared Planning Tool

PLAN

Me:

Baby:

Progress:

NEXT HUDDLE

Wrapping up the Huddle based on the PLAN:

1. Set expectations and make sure the patient understands what is coming
2. Identify potential planned or as needed Huddles to note on the board

Next Huddle

Facilitating situational awareness

Baby

Labor Progress

NEXT HUDDLE *Anytime we need to*

By 10pm

After next exam *~2 or 3 hours*

EARLY LABOR

ACTIVE LABOR

PUSHING

There is no prescribed number of huddles expected to occur per patient, per day, or per birthing experience

The goal is:

- To have a huddle anytime there is a change in conduction or care plan and by request
- *Not* to make you huddle more than is necessary for the typical standard of care

WHEN TO HUDDLE

Door to Door TeamBirth

TeamBirth sets the standard for team communication throughout every birthing journey.

TeamBirth will look different based on:

- Your specific unit structure
- Your patient's unique preferences and medical needs

**Triage /
OBED**

Discharge

Door to Door TeamBirth

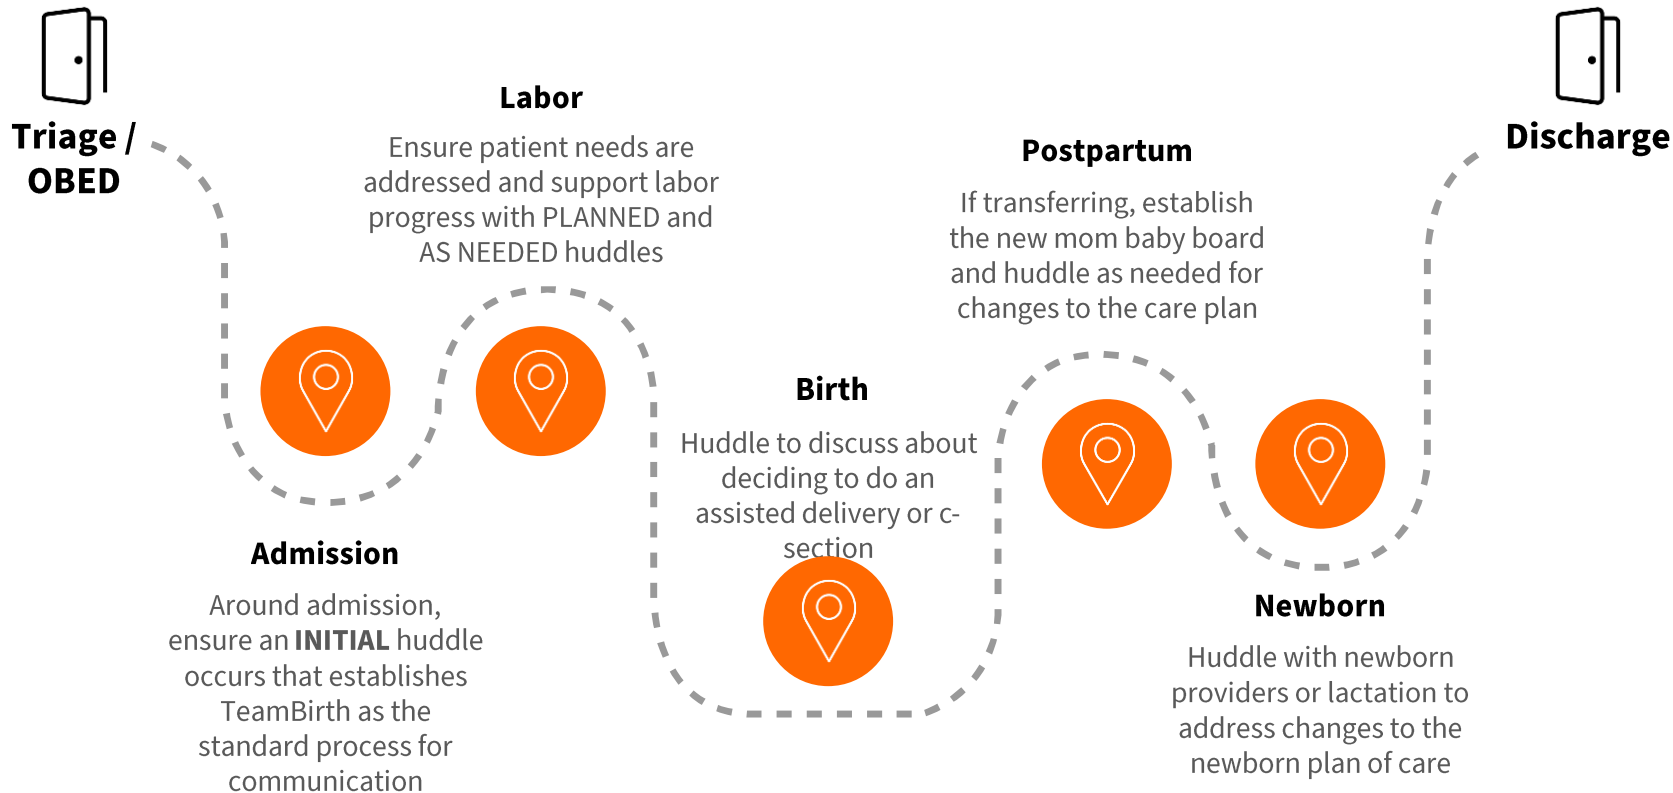

There are **key moments** throughout each journey when it is essential to use TeamBirth.

Though these moments are core, how and when they happen will depend on your unique structure and your patient's unique needs.

Door to Door TeamBirth

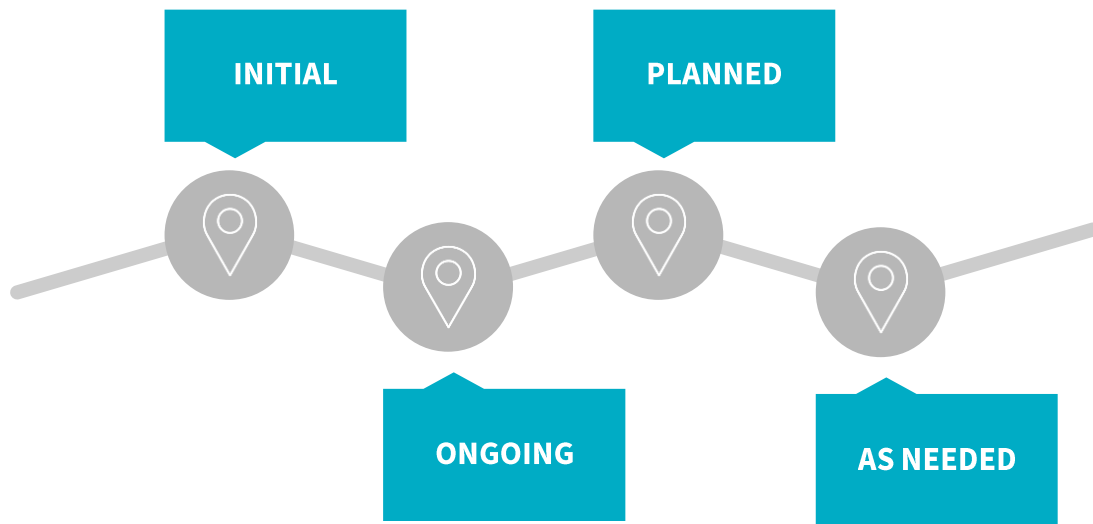

These **key moments** describe how TeamBirth is put in practice throughout the birthing journey.

Types of Huddles

These four different types of huddles help you identify and define what the **key moments** for TeamBirth look like in your unique context

They help you decide what will **spark** your huddles

Sparking a Huddle

Each huddle starts with a **spark**  which is anyone identifying the need for a huddle.

There are many different reasons to huddle, but a huddle will never happen unless someone identifies the spark.

Types of Huddles

Every patient at a TeamBirth facility should experience an initial huddle

INITIAL

Occurs at or around admission to establish TeamBirth as the standard care process for communication for every patient

“Is this patient ready to admit?”

ONGOING

Occurs at key decision points, changes in the plan of care, and requests from any team member

Types of Huddles

PLANNED

Based on clinical workflows. Commonly understood time points when huddles are expected can be predicted or scheduled

AS NEEDED

Initiated when there is an unplanned update or communication need, often identified by the patient, support person, or nurse

Any member of the care team (including patients and support persons) requests a huddle

Identifying your key moments and their sparks

	PLANNED	AS NEEDED
INITIAL	<ul style="list-style-type: none"> » Labor evaluation » Labor induction » Scheduled C-section 	<ul style="list-style-type: none"> » Active labor admission » Transfer in from other facility or community birth setting » Postpartum readmission » High-risk/antepartum admission
ONGOING	<ul style="list-style-type: none"> » By provider or nurse request » AROM » Antepartum/postpartum rounding at set intervals <p><i>Adaptation:</i></p> <ul style="list-style-type: none"> » <i>Tuck-in rounds</i> 	<ul style="list-style-type: none"> » By patient or family request » Labor progress concerns » Consideration for assisted delivery » Category 2 tracing » Hypertension » Postpartum hemorrhage » Newborn hypoglycemia » Hyperbilirubinemia » Substance exposure <p><i>Adaptation:</i></p> <ul style="list-style-type: none"> » <i>Transfer of care</i> » <i>Second stage huddle (start and after 2 hours)</i>

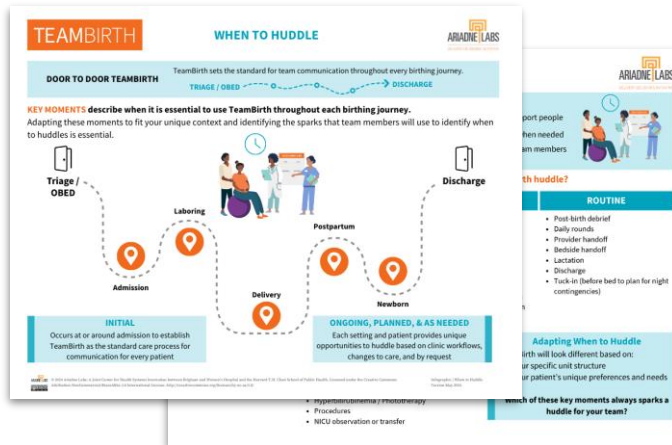

“Are we going to start supplementing with formula?”

Huddle Timing

Review the TeamBirth Components resource for guidance on adapting Huddles to your unique context
go.ariadnelabs.org/TBcomponents

Use the [When to Huddle](#) infographic to align with your teams on your patient journey's unique key moments and huddle sparks

22 surveys completed

3 surveys underway

The goal of TeamBirth is to:

Elevate the role of the birthing person and make them the center of their ...

Improve patient experience

Give birthing people the role they want in their care

All of the above

What are the 4 sections of the shared planning board?

Team, preferences, plan, next huddle

74%

Team, mom, baby, next huddle

9%

Preferences, mom, baby, next huddle

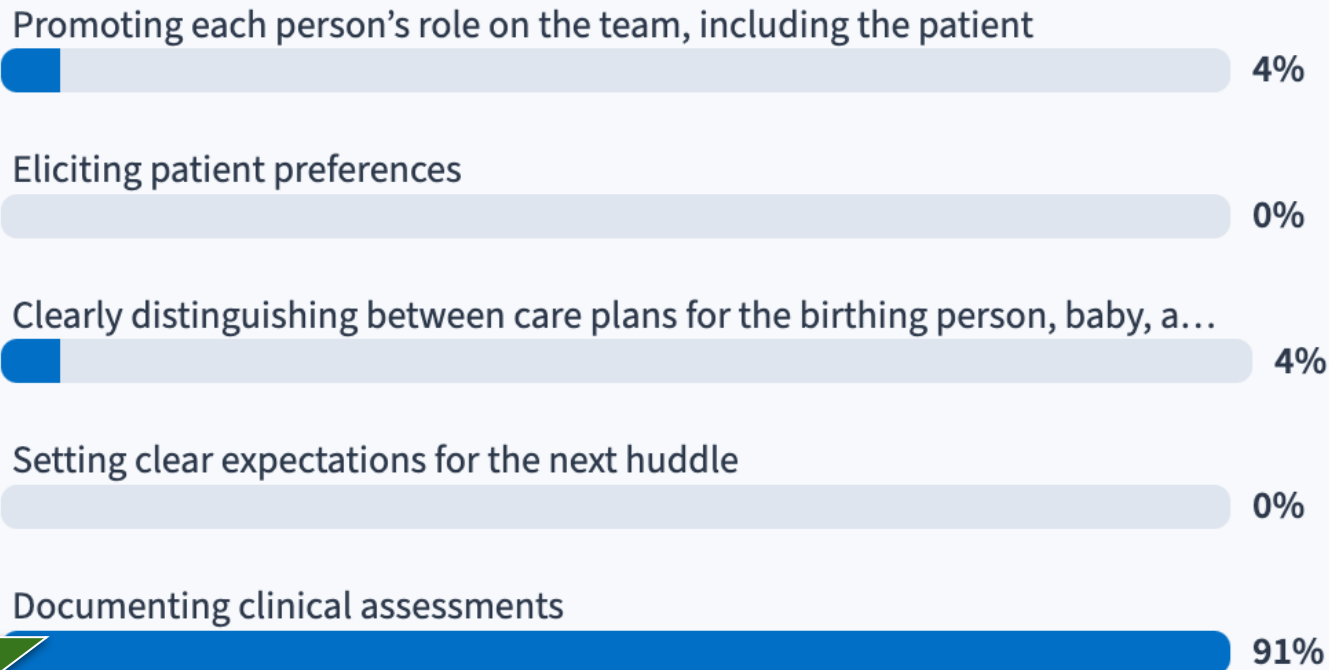

0%

Team, preferences, care, next huddle

17%

Which is NOT a key behavior of a TeamBirth Huddle?

All patients should have an initial huddle at or around their admission.

True

100%

False

0%

On your units, what key moments do you think will be easiest for teams to spark a huddle?

At admission, before pain medications, after epidural, with routine cervical checks

provider rounding; admission, cervical exams, ped rounding, etc.

admission

category II tracing

on admission, transfer, change in patient status

Change of plan

How does this impact a normal post partum patient. If there are no issues for a huddle?

admission ,plan progress

admission ,plan progress

Triage, Admission, Change in Pain Management preference,

Admission or initiation of treatment

after multidisciplinary rounds

in between care.

labor changes,

At admission, before pain medications, after epidural, with routine cervical checks

change in pt status or pt preference

Lactation

request for pain management or epidural outside of patient's plan

Admission

IMPLEMENT

ENGAGE & COACH PHASE

PROVIDE TRAINING & PRACTICE HUDDLES

CORE: Establish the knowledge for applying TeamBirth's components (huddles, the shared planning tool, and discussion and support guides) AND put training into practice by applying knowledge in practice scenarios with multidisciplinary groups

OBJECTIVES

Identify who should be trained

Ensure everyone who received training has multiple opportunities to practice huddles

Develop and begin your TeamBirth training strategy

Milestones:

- ☐ All Champions completed training
- ☐ All clinicians completed training (goal: minimum of 80% completed by launch)

ADAPT

Your strategy for training: who, how, and when

Training Timeline

Start by training and practicing with your champions so they are ready to support staff training this fall through launch

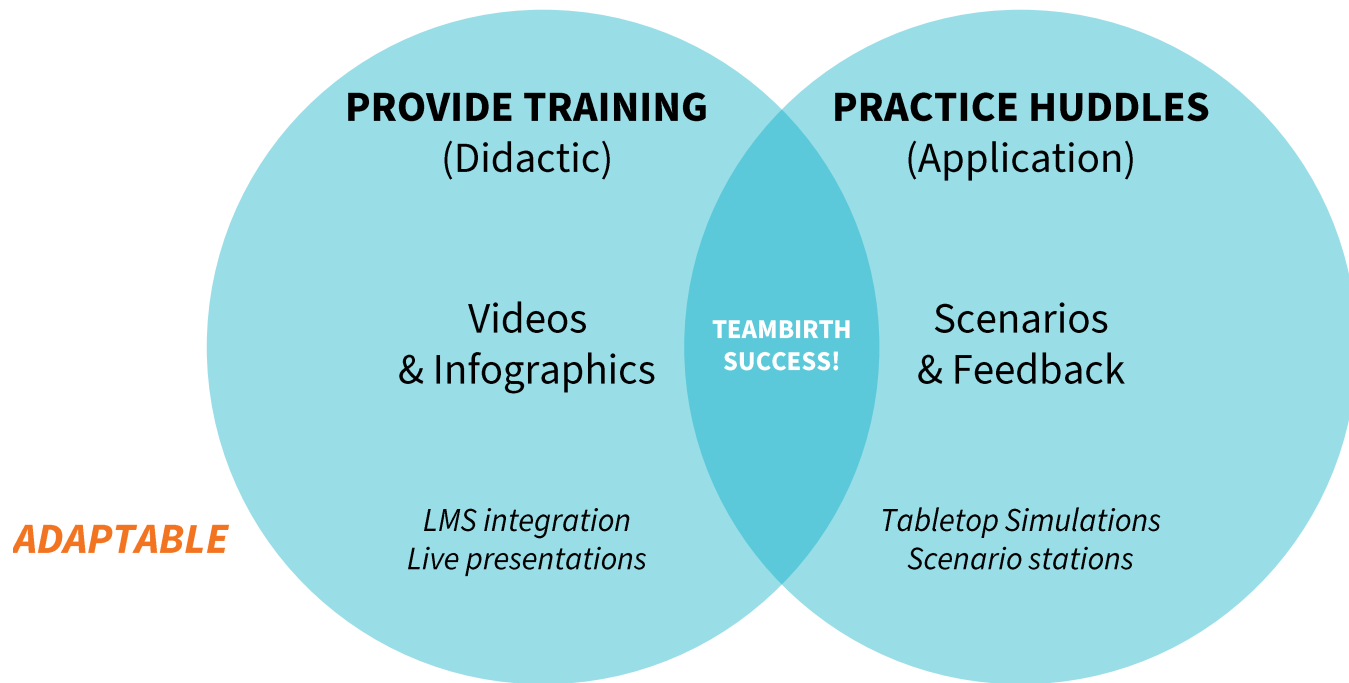

To ensure TeamBirth success,

Ensure everyone has the necessary knowledge AND the opportunity to apply it

| <ul style="list-style-type: none"> ● Assign videos in online learning management system ● Distribute QR codes for YouTube links ● Give your own live presentation of TeamBirth video content ● Supplement videos with TeamBirth resources like the infographics | <ul style="list-style-type: none"> ● Role play huddle simulation in multidisciplinary groups ● Tabletop scenario practice ● Demos ● SIMs ● Combine with skills day |
|---|---|

Many approaches to training

On-shift events

- Scenario station for training
- On the fly education
- TeamBirth “roadshows”
- Office hours
- TeamBirth education station
- Mini-trainings at shift changes

Off-shift events

- OB clinics
- SIM lab
- Repurpose unit meetings for multidisciplinary scenario practice and discussion
- Department dinner and training
- Add huddle practice to existing skills labs

Training Tips

TeamBirth Education Stations

Training Tips

Practice, practice, practice!

Develop your training strategy

There is no one way to train, use strategies that have worked for you

Use the [HOW TO](#) resource to start planning your training!

TEAMBIRTH Adapt your shared planning tool

HOW TO | Provide training & practice huddles

Training staff to do TeamBirth in practice is a major milestone for implementation. Developing your unique training strategy requires decisions and a plan that integrates training and practicing of huddles with existing clinical and quality improvement processes.

Preview and download the training resources here:

go.ariadnelabs.org/TBtraining

There is no one way to train, use strategies that have worked for you

Assign training videos to staff based on relevant content to their role which is outlined below:

Roles	Videos	Video 1: Why TeamBirth is for everyone!
Implementation Team	1 - 7	Use early and often for socialization
OB Providers & Midwives	1 - 6	
LDRP RNs, Doula's, CBEs	1 - 6	
L&D RNs	1 - 3, 5 - 6	
Anesthesiologists / CRNAs	1, 2, 6	
Postpartum RNs, Lactation, & Newborn Providers	1, 2, 4	

With input from your teams, align on your training plan:

- ☐ What are the best training methods to reach all the staff and providers in your units?
 - ☐ How do these methods differ for different groups?
 - ☐ How will you assign content and track completion?
 - ☐ How will you support practice and application of training content?
- ☐ How will the implementation team identify and mitigate barriers to training and practice?
- ☐ How will the implementation team support ongoing practice and education, as well as onboarding of new staff?

Define your training timeline and milestones

- ☐ Training videos and resources uploaded to your learning management system
 - ☐ Content is ready in time to train Champions
- ☐ Train all clinicians who may be part of the direct care team (e.g. nurses, midwives, physicians)
- ☐ Champion facilitate huddle practice with staff after training

HOW TO | Provide training & practice huddles
Version: July 2024

What could
TeamBirth
training look like
for you?

PREPARE

START >

> OUTCOMES

ENGAGE & COACH

MONITOR

Core Implementation Activity: **CONDUCT PATIENT SURVEYS**

IMPROVE

USTAIN

IMPLEMENT

CONDUCT PATIENT SURVEYS

CORE: Capture patient experience at baseline and post-launch to ensure TeamBirth progress and impact

OBJECTIVES

- Develop and prepare for your patient surveying strategy
- Begin baseline patient surveying several months before launch and continuing surveying for at least 6 months
- Iterate your surveying strategy to ensure robust response

Milestones:

- ☐ Baseline survey active before launch
- ☐ Switched to post-launch survey week of launch

ADAPT

Your unique data collection strategy and methods

Your Measurement Strategy: Patient Surveying

TeamBirth implementation requires input from patients and care teams

Patient Survey

WHO Patients who delivered at your hospital

WHAT Questions on: demographics, experience of huddle and board use, Mother's autonomy in decision making scale, and patient feedback on their overall TeamBirth experience

WHY To collect first hand experiences of patients throughout implementation in order to inform opportunities for improvement and demonstrate TeamBirth impact

WHERE Inpatient postpartum units

HOW Via paper or digital surveys delivered according to your surveying methods and strategy

WHEN *Baseline: Oct '24 - Jan '25*
Post-Launch: Week of Launch - 6 months

PREPARE

START >

> OUTCOMES

ENGAGE & COACH

MONITOR

Core Implementation Activity: **ASSESS YOUR CONTEXT**

IMPROVE

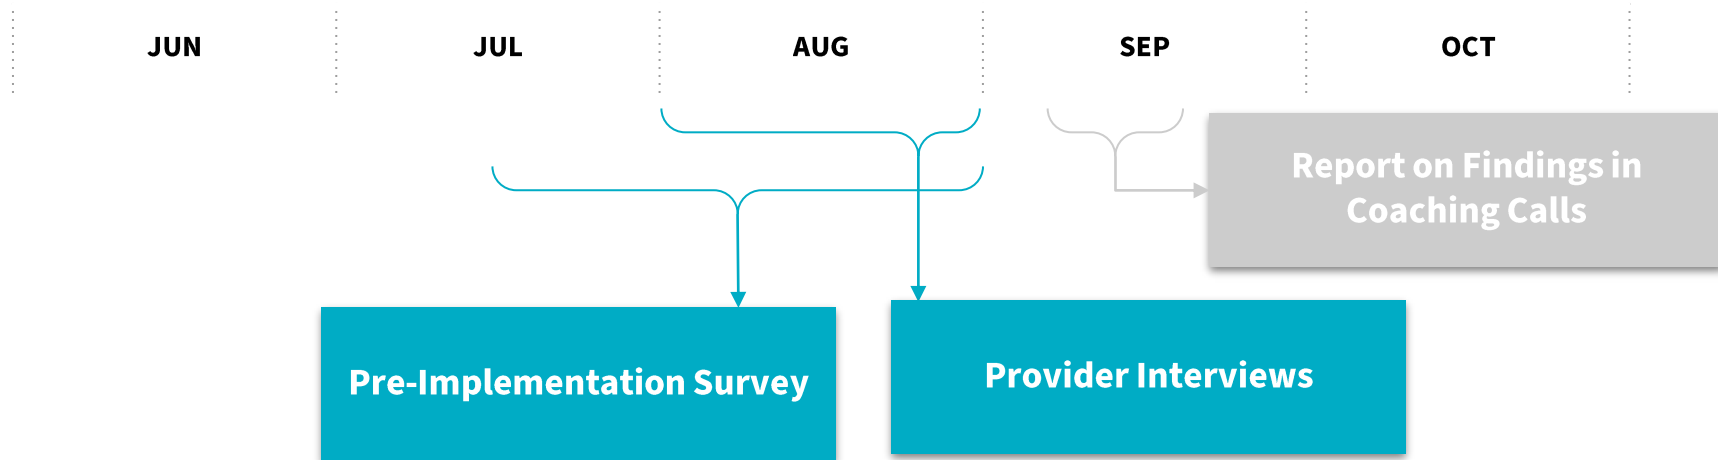

IMPLEMENT

USTAIN

ASSESS YOUR CONTEXT

Prepare for your assessment:

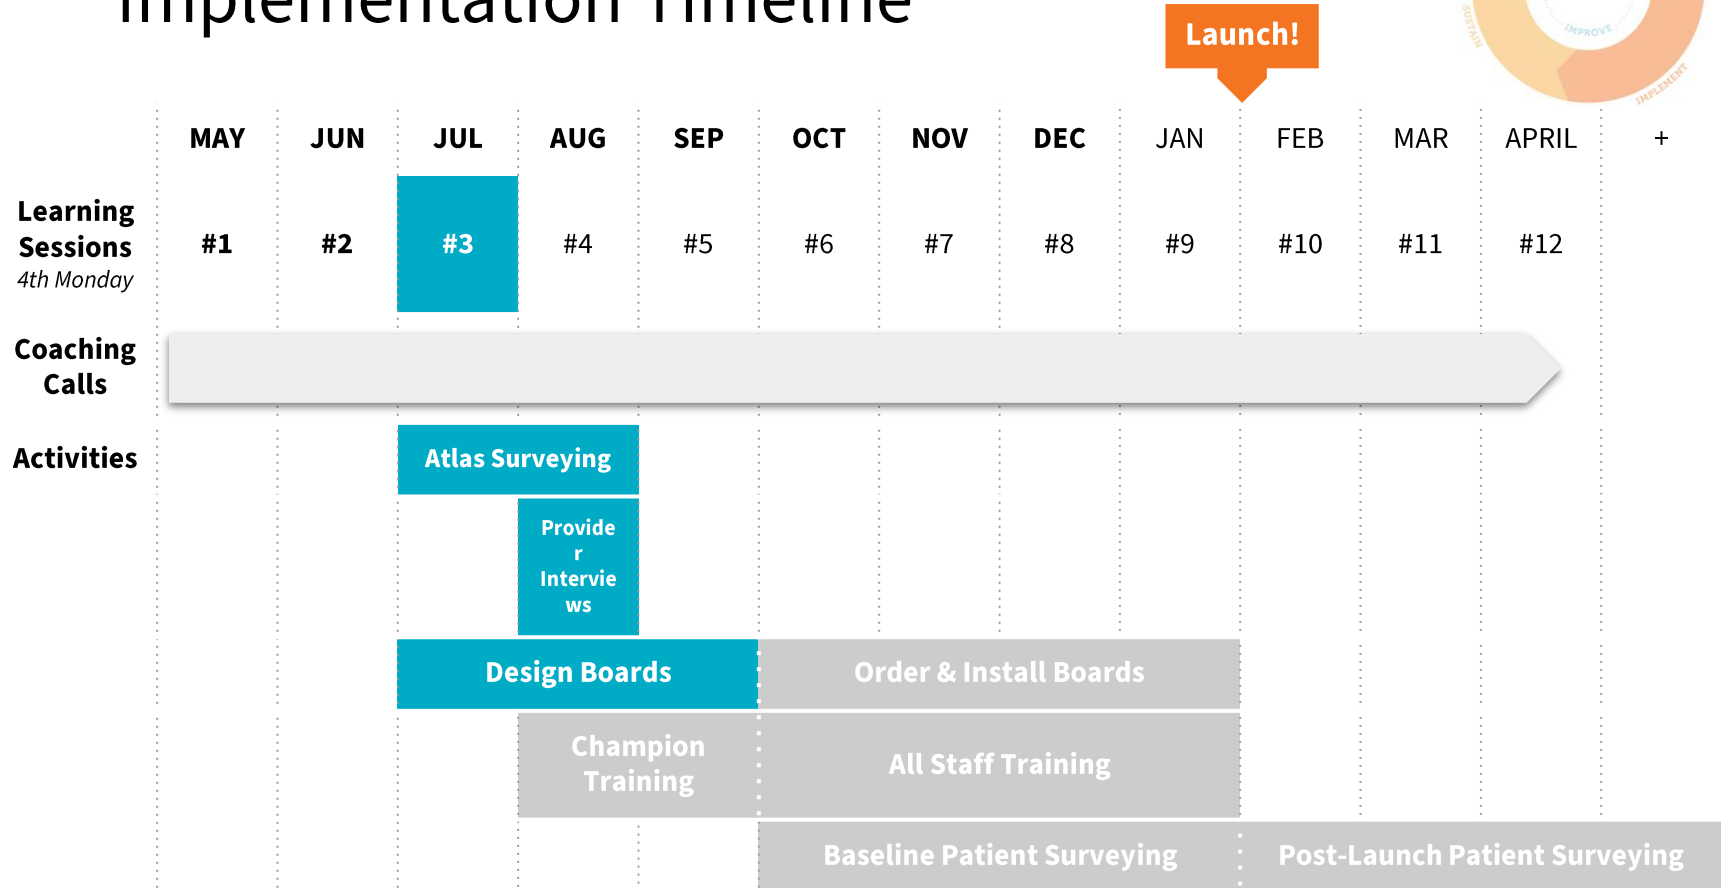

- Share the Atlas survey and provide reminders while advocating for survey completion to **reach the 60% response rate goal**
- Invite providers to schedule short 30 min interviews in **August**

Looking Ahead

Implementation Timeline

Today's Key Takeaways

Shared Planning Tool: NEXT HUDDLE

- Setting clear expectations for future huddles
- Reduces uncertainty by providing transparency
- Ensures everyone knows that anyone can request a huddle

WHEN TO HUDDLE

- All patients should have an initial Huddle to establish norms
- Ongoing, planned, and as needed Huddles will occur throughout their stay at key decision points or requests

Provide training & practice huddles

- Establish staff knowledge for applying TeamBirth's components
- Apply train via practice scenarios with multidisciplinary groups

Conduct Patient Surveying

- Collect first hand experiences of patients throughout implementation to inform opportunities for improvement and demonstrate impact

Assess Your Context

- Surveying staff to understand your strengths and opportunities for improvement is essential
