

Cohort 4 Collaborative Learning Session #6

October 28, 2024

**TeamBirth: Process Innovation for Clinical Safety,  
Effective Communication, and Dignity in Childbirth**

# Learning Session Agenda

## Introduction

### TeamBirth Core Knowledge & Skills

- Recap: Core components
- Practice Scenario for doula engagement

### TeamBirth Implementation

- Current core activities:
  - Test & improve
  - Monitor & celebrate progress

## Looking Ahead

- Takeaways From Today
- Action Items
- Feedback Survey

## TEAMBIRTH NJ COHORT 4

TeamBirth is a shared decision-making program that aims to improve safe and respectful childbirth care.

It involves a series of team huddles and other tools used during labor and delivery, to improve communication and ensure care that aligns with patient preferences.

Developed by Ariadne Labs, TeamBirth was designed to operationalize best practices in communication, teamwork, and clinical care, in collaboration with experts from the major

# TeamBirth Core Knowledge & Skills

# TeamBirth Core Components

**STRUCTURED TEAM HUDDLES + SHARED PLANNING TOOL:** Critical to successful delivery of TeamBirth across the maternal health continuum

**TEAMBIRTH**

**WHEN TO HUDDLE**

**DOOR TO DOOR TEAMBIRTH** TeamBirth sets the standard for team communication throughout every birthing journey.

TRIAGE / OBED → DISCHARGE

**KEY MOMENTS describe when it is essential to use TeamBirth throughout each birthing journey.** Adapting these moments to fit your unique context and identifying the sparks that team members will use to identify when to huddles is essential.

**Triage / OBED**

**Admission**

**Laboring**

**Delivery**

**Postpartum**

**Newborn**

**Discharge**

**INITIAL**

Occurs at or around admission to establish TeamBirth as the standard care process for communication for every patient

**ONGOING, PLANNED, & AS NEEDED**

Each setting and patient provides unique opportunities to huddle based on clinic workflows, changes to care, and by request

© 2024 Ariadne Labs. A joint center for health systems innovation between Brigham and Women's Hospital and the Harvard T.H. Chan School of Public Health. Infographic: When to Huddle Version 3.0 | 2024

**BIRTH**

**WHEN TO HUDDLE**

- Any member of the team may call for a huddle and/or lead the conversation
- Gather all members of the direct care team, including the patient and their support people
- Hold huddle in person when possible, but can also be conducted over phone when needed
- Designate a facilitator to prompt the huddle, lead discussion, and ensure all team members have the opportunity to participate

**What are your team's key moments that spark a TeamBirth huddle?**

INITIAL	KEY DECISIONS & CHANGES TO CARE PLAN	ROUTINE
<p>Use of the Discussion Guide</p> <p>Postpartum care planning</p> <p>c-section</p> <p>in other facility</p> <p>readmission</p>	<p><b>Laboring:</b></p> <ul style="list-style-type: none"> <li>Use of the Labor Support Guide</li> <li>AROM</li> <li>Augmentation</li> <li>Pain management</li> </ul> <p><b>Delivery:</b></p> <ul style="list-style-type: none"> <li>Internal monitoring</li> <li>Use of the Assisted Delivery Discussion Guide to guide discussions about doing an assisted delivery (i.e. vacuum, forceps) or c-section</li> </ul> <p><b>Postpartum:</b></p> <ul style="list-style-type: none"> <li>Hemorrhage</li> <li>Blood pressure management</li> <li>Pain management</li> </ul> <p><b>Newborn:</b></p> <ul style="list-style-type: none"> <li>Antibiotics</li> <li>Hypoglycemia / Supplemental feedings</li> <li>Hyperbilirubinemia / Phototherapy</li> <li>Procedures</li> <li>NICU observation or transfer</li> </ul>	<ul style="list-style-type: none"> <li>Post-birth debrief</li> <li>Daily rounds</li> <li>Provider handoff</li> <li>Bedside handoff</li> <li>Lactation</li> <li>Discharge</li> <li>Tuck-in (before bed to plan for night contingencies)</li> </ul>

**Adapting When to Huddle**

TeamBirth will look different based on:

- Your specific unit structure
- Your patient's unique preferences and needs

**Which of these key moments always sparks a huddle for your team?**

# Resource Spotlight

## Guide to Eliciting Preferences 1-pager

TEAMBIRTH
Guide to Eliciting Preferences

Identifying and understanding a birthing person's preferences is key to providing equitable care and essential for shared decision making

Preferences often develop or evolve over time. An existing birth plan likely has some preferences articulated. The Huddle section on preferences may reference a birth plan, but discussion should reflect what matters most to the birthing person at the time of the Huddle.

**The Initial Huddle**

**During the admission process**, ask open-ended questions to help the care team gauge how the birthing person and support people understand the admission process and care plan as well as identify what gives them a sense of safety and comfort. Responses provide an opportunity for education, adjusting expectations, and minimizing confusion as labor progresses.

Elicit patient preferences by asking open-ended questions like:

- What has been working for you at home?
- What things were you picturing you might use for comfort in labor?
- What have you read/heard about labor that you're wondering about for yourself?

**Ongoing Huddles**

**Anytime a Huddle occurs**, open-ended questions help the care team understand what the birthing person is experiencing and what is important to them.

Elicit patient preferences by asking open-ended questions like:

- What are you concerned or worried about right now?
- What are your hopes or wishes right now?
- What is bothering you or frustrating you right now?
- What is comforting you or reassuring you right now?

# Activity

1. When do you think it will be the MOST CHALLENGING for your teams to spark a huddle?
2. When do you think it will be MOST INTUITIVE OR EASIEST for your teams to remember to spark a huddle?

# TeamBirth Practice Scenario

# Incorporating doulas into huddles

# DOULAS

## SCENARIOS AND PRACTICE

### DURING ADMISSION, BEFORE A HUDDLE

While getting Kelsey settled, Nurse Trisha asked if she has a birth plan or wants to share any specific birth preferences. Kelsey shares that she started a birth plan with her doula Isabel but didn't end up finishing it since she knows so much can change.

**Doula:** “Yes! We started to talk about some of Kelsey’s hopes for labor and birth, knowing of course that things can change. I’m here to support her in having a positive experience in any case.”

**Nurse:** Yes, it’s ok either way. You can tell us things that are important to you anytime throughout your stay. What’s on your mind right now?

**Kelsey:** “Well, I’m interested in trying to go natural for as long as possible and trying some pain-coping techniques with Isabel, like walking around, massage, and bouncing on the ball. I do know I want Niko to come up here (Kelsey pats her heart ❤️) right after birth, and I want to try breastfeeding as soon as possible. And I want my aunt Yara to be with Niko if there’s any time I can’t be.”

## Labor & Delivery Shared Planning Tool

### TEAM

*Kelsey & Baby Niko*

*Isabel - Doula*

*Yara - Auntie*

*Trisha - Nurse*

*Whitney - Midwife*

### PREFERENCES

*go natural as long as possible*

*pain coping with Isabel*

*Niko to Kelsey's chest right away*

*breastfeed ASAP*

*Kelsey or Yara with Niko all the  
time*

### PLAN

# DOULAS

## SCENARIOS AND PRACTICE

**ADMISSION HUDDLE**

**Midwife:** “Okay, let’s huddle! Nurse Trisha let me know that your water is broken. Lots of first-time mamas have their water break first before labor starts. We can discuss a few options to ensure your labor continues progressing. I see that you are hoping to go natural as long as possible, so a first step could be walking around and bouncing on the ball with support from your doula and sister. We will monitor you closely in case there's any indication for augmenting your labor medically with Pitocin.”

**Kelsey:** “That sounds good. I remember hearing about Pitocin during a prenatal visit and from Isabel. I think Yara had Pitocin too for her labor and found it to be really painful.”

# DOULAS

## SCENARIOS AND PRACTICE

### ADMISSION HUDDLE

**Midwife:** “Right, so when your water breaks and you’re not in labor, we often give Pitocin to get it going. [explains pitocin]”

**Kelsey:** “Oh–am I *not* in labor? I’ve been having contractions ever since my water broke.”

**Nurse:** “The monitor shows you’re having contractions every 3-5 minutes, but you don’t seem to notice most of them. Does that sound right?”

**Doula:** “Kelsey was squeezing my hand and breathing really hard every 10 minutes, I’ve been timing it. Now she's doing that every 6 or 7 minutes, and she is squeezing my hand a lot harder. So I think Kelsey maybe *is* in labor?”

# Labor & Delivery Shared Planning Tool

## TEAM

*Kelsey & Baby Niko*

*Isabel - Doula*

*Yara - Auntie*

*Trisha - Nurse*

*Whitney - Midwife*

## PREFERENCES

*go natural as long as possible*

*pain coping with Isabel*

*Niko to Kelsey's chest right away*

*breastfeed ASAP*

*Kelsey or Yara with Niko all the time*

## PLAN

Me

*Eat a snack!*

*Move around*

Baby

*Listen on & off*

Labor Progress

*try lots of moves now*

*start Pitocin later if needed*

**NEXT HUDDLE** *as needed*

*in 2-3 hours*

# Core Implementation Activity: **TEST & IMPROVE**

IMPROVE

USTAIN

IMPLEMENT

# TEST & IMPROVE

**CORE:** Conduct small scale testing to create and improve the adapted TeamBirth components as well as implementation activities

## OBJECTIVE S

Test your adapted board design with champions in huddles and get their feedback to improve your design

Make changes to your patient surveying strategy to improve response rates

Gather feedback from teams about how training and huddle practice is going and make strategy updates as necessary

### Milestones:

- Champions complete small scale board testing with 10 patients

## ADAPT

Who you involve and your methods and timeline for improvement

# Small-Scale Testing: Training

Have your Champions complete training and start practice huddles

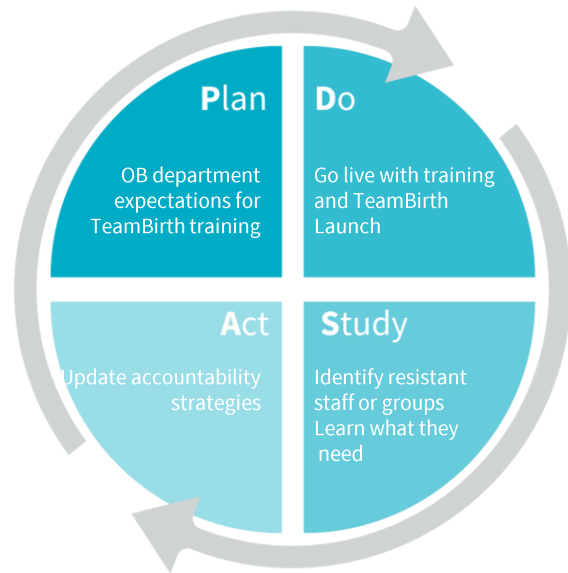

Set up a PDSA cycle to iron out huddle practice strategies

# Small-Scale Testing: Accountability

Ensure all staff have clear expectations for doing TeamBirth post launch

Set up a PDSA cycle to hold providers accountable

# Small-Scale Testing: Patient Surveying

Gather feedback and monitor data to learn how to improve surveying processes

Set up a PDSA cycle to improve surveying success

## Survey Processes

- Prepare to Survey**
- Collect Data**
- Analyze & Review**
- Share Results**

IMPLEMENT

## IMPLEMENT PHASE

# MONITOR & CELEBRATE PROGRESS

**CORE:** Monitor TeamBirth processes and experience data to inform improvement and celebrate progress towards impact goals

## OBJECTIVES

Ensure process and patient data is collected and analyzed

Ensure team agenda time to discuss data and identify opportunities for improvement

Plan for and carry out updates to leaders and staff

Celebrate progress from baseline and highlight ongoing need for effort

### Milestones:

- 80% staff completed training
- 70% patients report experiencing a huddle
- % of patients reporting huddles increased for 3 consecutive months
- Communication strategy post-launch activities carried out
- Routine implementation team data review established

## ADAPT

Who you involve and your methods and timeline for analysis and sharing

# Tracking implementation activity progress

How do you know implementation is happening as expected?

- What outputs or process metrics did you prioritize in your measurement plan?
- Review the [Implementation Checklist](#) to see what activities are still outstanding
- What staff still need training or reinforcement

**TEAMBIRTH Implementation Checklist**

Each implementation phase includes milestones and implementation activities that systematically guide TeamBirth integration while providing flexibility to adapt the process to your unique system's needs and timeline.

Use this checklist to guide your implementation planning. Items are not necessarily sequential and many may be completed concurrently.
